### **Loud and Clear!**

Turn up the volume on this new television from Onida and it's like a jack-hammer inside your brain. A 1,000 watts of audio output is a lot, add a woofer and you're talking Boeing 747 take-off levels of noise. Well, almost.

On a positive note, the set comes with Onida's impressive 'iPLAYON' technology which plays back most digital formats, including Xvid and DivX. This should please those who scour the Internet for content.

It scores on other fronts as well— good contrast and picture, Full-HD playback and easy to set up.

Pros: It's loud. And it plays back several digital video formats

Cons: It's loud. Very loud

Price: Rs 33,900
