Rockyour world with Onida 32 Diamond KY Rock !!

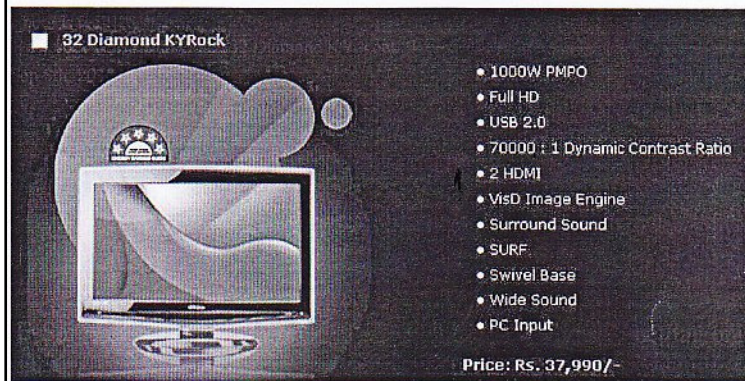

Sep 8th, 2010 by admin

The most important attribute in an audio player is the sound quality. I'm sure many of us like to listen to music or watch television during our past time. Imagine how irritating it can get if we find the audio quality very poor. This is why not many home theater systems are not doing a great job despite the promises made by the manufacturer.

Mire Electronics Ltd has unveiled its Onida 32 Diamond KY Rock — with a 1000-watts surround sound system and in-built woofers. Its unparalleled, crystal-clear sound along with a full high definition picture technology provides a 2 mega pixels resolution that is nearly six times that of a standard definition TV.

Another exclusive attraction is its USB 2.0 interface that allows to conveniently plug-in any USB device and play music, songs and videos directly from it. The Price range is expected to be something between Rs 37000 to 39000. Looking at the features of this particular product, we can say with no hesitation ... "HERE COMES A WINNER!!!!".
